Face Mist (Hydrating Spray) Ingredients: Distilled water, aloe vera, rose water, glycerin, essential oils (lavender, tea tree, etc.)	Asteria Apothecary, Habonera Soap, supermarkets (distilled water)

2. Machines

Mixing and Homogenizing Machines: These are used to thoroughly blend raw ingredients, such as oils, water, emulsifiers, and active compounds, into a smooth, uniform product like creams, lotions, or foundations.

Filling Machines: These machines accurately dispense the finished product into various containers, including bottles, jars, tubes, and compacts, ensuring precise volumes and minimizing waste.

Capping and Sealing Machines: After filling, these machines securely close and seal the product containers to prevent contamination and leakage, maintaining product integrity.

Labeling Machines: These apply product labels to the containers, providing essential information like ingredients, usage instructions, and branding.

Packaging Machines: Used for boxing, wrapping, and preparing products for shipment, ensuring they are protected during transit and presented professionally.

Quality Control Equipment: This includes laboratory instruments like pH meters, viscometers (to measure thickness), and stability chambers to test raw materials and finished products for safety, efficacy, and shelf-life before they reach consumers.

3. Manpower

In running our Glow Up Essentials business, everyone in the group has an important role. We all need to work together and be ready to help out. Each person has a task to do so the business can run smoothly. Here's a simple breakdown:

Leader – The one who guides the group and makes sure everything is organized.

Cashier – Handles the money and keeps track of what we earn and spend.

Assistant – Helps both the leader and cashier with anything they need.

Cook – The person who makes our products, like lip balm, soap, etc.

Seller – The one who sells the products and talks to customers. By sharing the work like this, we all learn, grow, and help the business succeed together.

4. Money

The financial aspect of Glow Up Essentials includes the investment needed for tools, materials, packaging supplies, and ingredients. These are essential to produce quality self-care and beauty products while ensuring consistent supply and attractive presentation for customers. It is necessary to know these costs because they help the business plan its budget properly, set reasonable product prices, and avoid overspending. By understanding the financial requirements, the business can ensure profitability, sustainability, and growth.

5. Methods

Makeup Kit

Steps	Description	Time Required
Foundation / BB / CC Cream: Mix oils, water, and wax. Add color powders. Blend until smooth.	Gives even skin tone and smooth base.	1–2 hours
Concealer: Melt wax and oils. Add color powders. Pour into small container	Covers dark spots and blemishes.	1 hour
Blush (Cream): Melt shea butter, cocoa butter, and beeswax. Add mica color. Mix well.	Adds natural pink or peach color to cheeks.	1 hour
Highlighter: Mix mica shimmer with base oil. Blend until smooth.	Gives glowing effect on skin.	30 minutes
Bronzer / Contour: Mix brown iron oxides, mica, and talc powder.	Shapes and defines face.	30 minutes
Eyeshadow Palette: Blend mica colors and iron oxides with binder. Press into palette.	Adds colorful shades to eyes.	2 hours
Eyeliner (Pencil): Melt wax with castor oil. Add black pigment. Shape into pencil.	Defines eyes with dark line.	1 hour
Mascara: Melt wax and oil. Add pigment. Place in tube with brush.	Darkens and thickens eyelashes.	1–2 hours
Eyebrow Pencil / Powder: Mix wax, oils, and iron oxides. Shape as pencil or press as powder.	Fills and shapes eyebrows.	1 hour
Lipstick / Lip Gloss: Melt beeswax, butters, and oils. Add color and flavor. Pour into tube.	Colors and moisturizes lips.	1–2 hours
Makeup Brushes & Sponge: Buy ready-made from suppliers.	Tools for applying makeup.	Ready-to-use

Skincare Set

Steps	Description	Time required
Facial Cleanser / Face Wash: Mix water, surfactants, aloe vera, and glycerin. Bottle it.	Cleans dirt and oil from face.	1 hour
Toner: Combine rose water, witch hazel, and glycerin.	Refreshes skin and tightens pores.	30 minutes
Serum: Mix hyaluronic acid, niacinamide, vitamin C, and oils.	Nourishes and repairs skin.	1 hour
Moisturizer (Day & Night Cream): Melt butters and wax. Mix with oils and aloe vera. Cool until creamy.	Keeps skin soft and hydrated.	1–2 hours
Sunscreen (SPF): Mix zinc oxide, titanium dioxide with cream base.	Protects skin from the sun.	1 hour
Eye Cream: Blend light oils with caffeine and retinol.	Reduces puffiness and dark circles.	1 hour
Face Mask (Clay): Mix clays with aloe vera. Store in jar.	Removes oil and cleans deep pores.	30 minutes
Exfoliator (Scrub): Mix sugar/salt with oils. Add beads if needed.	Removes dead skin and smooths face.	30 minutes
Lip Balm / Lip Scrub: Melt wax and butters. Mix oils and sugar (for scrub).	Softens and smooths lips.	30 minutes – 1 hour
Face Mist (Hydrating Spray): Mix distilled water, aloe vera, rose water, glycerin, and essential oils. Bottle it.	Refreshes and hydrates skin anytime.	30 minutes

Both makeup and skincare sets are made by mixing natural oils, waxes, powders, and active ingredients. Most products require melting, blending, and cooling, while powders need pressing into containers. Skincare products are often water-based mixtures stored in bottles or jars. Production time usually ranges from 30 minutes to 2 hours per product depending on complexity.

6. Production Capacity

Setup	Output per batch	Batches per day	Total Daily Output
Small factory/store	100 units	1–2 batches/day (depending on manpower & demand)	100 to 200 units per day

Glow Up Essential operates on a small-scale production setup, ideal for handcrafted or semi-manual skincare and cosmetics products. Each batch produces around 100 units, and the team can complete 1 to 2 batches per day, depending on order volume and labor availability. This setup allows the business to maintain quality and consistency while staying flexible for custom orders and growth.

7. Quality Control and Safety

Hygiene is key. Cleanliness is a must. We maintain a clean, safe environment through regular cleaning. Staff will be trained in product safety. By following these, Glow Up Essentials ensures products are safe, effective, and meet standards.

8. Operational Hours

Glow Up Essentials will be open seven days a week, from 10:00 AM to 7:00 PM, ensuring customers can purchase products daily. Production runs from 9:00 AM to 4:00 PM, with a lunch break at 12:00 NN to 1:00 PM and cleaning and quality checks from 4:00 PM to 5:00 PM to maintain efficiency and product quality.
